Description

Guests can tackle the ascent at ease via the gondola lift and then wholly concentrate on the challenging downhill sections during the day. Try not to be distracted by the views to the Großglockner. The first section of the single trail is very difficult and is only recommended for experienced riders. The second section (end of the forest, as soon as you come to the farm road) is easy to negotiate. The trail starts at the intermediate station for GG-Resort Bergbahnen at 1960 m. The destination is Großdorf at 1260m with the overall length of the route being 4.76 km.
