Description

The single trail starts at the mountain station for Kals Gondelbahn on the Cimaross. From there you get to enjoy a superb panoramic view to more than 60 mountains which are above 3000m. The single trail which is around 3.7 km in length and which flows well, proceeds right through the natural surroundings which features Alpine roses and arnica. The Großglockner massif is always in your line of sight. The 420 metres altitude into the valley is covered via approximately 60 steep bends and there are numerous little jumps, waves and troughs to suit all abilities. A particularly successful, natural single trail, aimed at the experienced cycling family. The end station is the intermediate station for the gondola lift.
